

Maths Summer 1 Week 3 – Measuring length

It's been a while since we have thought about and measured length...right back in Autumn term when we built our wooden houses...so this week we are going to revise measuring and length.

There is a video clip to watch for each session from the great team at 'White Rose Maths' – it starts with a 'flashback' activity, which will be in place of your daily 'Problem of the Day' this week. 😊 The video helps to revise and develop your skills, has a couple of examples to work through together, and then there is a set of questions to answer. Below are the links to the videos, and a quick run down of which questions are the Securing Skills, Mastery or Greater Depth. Everyone should definitely be able to have a go at Securing Skills questions and then it is up to you to see how far you can apply your skills.

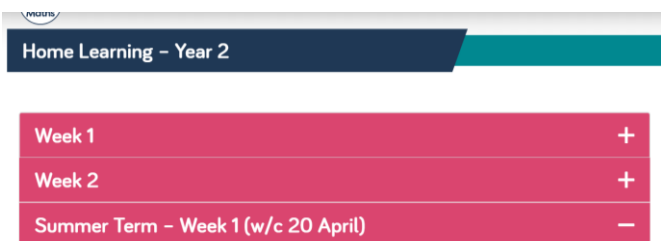

We have been unable to link you straight to each video due to the security and copywrite on the site, so here are the instructions to get you to where you need to be...

Use the link to open the White Rose Year 2 page

<https://whiterosemaths.com/homelearning/year-2/>

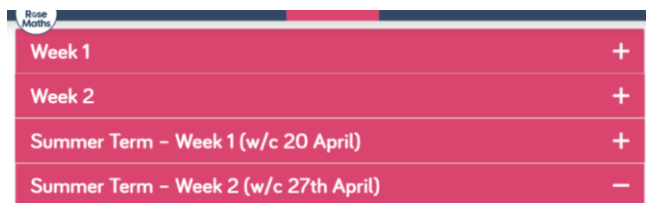

and then from the pink drop down tabs, select Summer Term - Week 1 (w/c 20 April)

And then locate lesson 3 and 4 - we are using these as our Monday and Tuesday sessions.

Our Wednesday, Thursday and Friday sessions are found by using the pink drop down tabs and selecting Summer Term - Week 2 (w/c 27th April). We will use sessions 1,2&3 from this week.

Each day's questions are next to the video, or can be found labelled up separately on our school website.

Here are each day's questions split into Securing Skill, Mastery and Greater Depth.

	Securing Skills questions	Mastery questions	Greater Depth questions
Monday task (lesson 3 w/c 20th April)	Q1 Q2 Q3 Q4	Q5 Q6	Q7 Q8
Tuesday task (lesson 4 w/c 20th April)	Q1	Q3 Q4	Q5
Wednesday task (lesson 1 w/c 27th April)	Q1 Q2 Q3 Q4	Q5 Q6	Q7
Thursday task (lesson 2 w/c 27th April)	Q1	Q2 Q3	Q4
Friday task (lesson 3 w/c 27th April)	Q1 Q2	Q3 Q4	Q5
