

Science - Spring 1 Wk4

We are going to focus in on one living thing, that can be found all over the world...finding out about it's habitat, anatomy (body), diet, food chain - including predators, why they are a gardener's best friend...

We are going to become experts on the 'earthworm'.

You might want to get out and getting digging to find your own worms so you can take a closer look.

You could even build a wormery to keep your worms in! Here is a link to how to make a wormery:

http://www.bbc.co.uk/gardening/gardening_with_children/homegrownprojects_watchworms.shtml

Tuesday

*Share the story of 'Yucky Worms' (attached as a separate document) or you can listen to it here:

<https://www.youtube.com/watch?v=MV3A864z9W0>

*Now use what you have discovered from the story to...

1. Label the picture of the worm's anatomy (turn it into a diagram)

2. Make some notes about a worm's:

1. Habitat (where it lives)

2. Anatomy (it's body)

3. Diet (what it eats)

4. Food chain - including predators

5. Why they are a Gardener's best friend

**Remember that notes don't need to be complete sentences, you can jot down important words and phrases.*

Wednesday

*Listen to the story 'Wriggling worms at work':

<https://www.youtube.com/watch?v=tmiaWZOnHFc>

Use what you've discovered, to add more information to your notes that you started yesterday.

Thursday

*Use these weblinks or the QR codes to watch 2 information videos about worms. Add what you find out to your notes.

<https://www.youtube.com/watch?app=desktop&v=uFKaD6NFjDQ&feature=youtu.be>

https://www.youtube.com/watch?app=desktop&v=l-zc_1vjLnI

*Carry out your own research using the child-safe search engine:

www.kiddle.co

What else can you discover about our wiggly friends?

Friday

*You are going to use what you have found out to create an information leaflet about worms.

*Here's a reminder about the features of a leaflet:

*Your leaflet needs to have a title page, and then a section for each of the things you have found out about:

- 1.Habitat (where it lives)
- 2.Anatomy (it's body)
- 3.Diet (what it eats)
- 4.Food chain - including predators
- 5.Why they are a Gardener's best friend

*These will make the subheadings (mini titles) for each section.

***Today complete** your **title page** and the section about '**Habitat**'. We will continue with the other sections of your leaflet next week.

*Remember to write in full sentences, and you can add images (draw them or print out and stick in) to illustrate the facts you are sharing.

*We have included 2 templates you could write your leaflet on, or you can use the paper you have at home - then you can include as many pages as you need so you can share everything you've found out!
