

Geography

Do a live weather forecast to your adults (inside your home).

If possible, record it and send it in to your teacher using the class email.

Draw your own map and design your own weather symbols, cut them out and place them on your map as you tell do your weather forecast.

Here is a link to a weather forecast you might like to watch from 1982 where magnetic symbols were used during the weather forecast. Start watching from 1 minute 33 seconds.
